

Jagrut Amuri

Biodesign x Storytelling

As a passionate student of systems of life, my journey is fuelled by unearthing and studying the multitude of unique adaptations of Earth's life forms. These stories are a mosaic of mystery, devotion, tragedy, resilience and triumph, unfolding across eons. I believe that by sharing these journeys, we can nurture a deeper connection towards each other and raise awareness of our place in the vast web of life we are all part of.

Education

2017-2021

BSc - Biological Sciences

Arizona State University

Notable Courses -

- Animal Behaviour (Eusocial Insects)
- Marine Conservation Science
- Vertebrate Zoology
- Animal Physiology
- Behavioral Ecology

Interests

I also explore the art and science of paper folding, especially as it relates to principles of nature such as spirals and tessellations. Link to [My Gallery](#)

I have been swimming competitively since I was 8 years old, winning over 100 state and national level medals and teaching me consistency and hardwork.

I love volunteering and **teaching**, I also moonlight as a breath work **guide** and yoga instructor.

As a passionate trekker, I have backpacked across the Sierras' in California and also spent time in the Himalayas.

I practice the flow arts and use props like the dapo star, poi and staff to explore rhythm and lines.

Prior Work - Links

- [Paper on the effect of temperature on locomotory behaviour of ants](#)
- [Presentation of the above in the Animal Behaviour Society \(Arizona\)](#)
- [Biomimicry Final Project](#)
- [My synopsis of 2 papers on animal behaviour.](#)

Experience

- Srishti Manipal Institute of Art, Design & Technology, Azim Premji University **2025- 26**
Visiting Faculty
 - Facilitated an interdisciplinary design workshop, integrating narrative structures, sensory experience, and digital interaction to explore how stories shape experience and design.
 - Developed facilitation and assessment frameworks that emphasized reflective learning, conceptual continuity, and creative exploration across visual, sonic, and movement-based media.
- Science Gallery Bengaluru **2024 - 2025**
Mediator
 - Facilitated meaningful engagement between the visitor and the exhibition, taking into consideration various predispositions and knowledge matrix .
 - Studied informal learning spaces in multiple perspectives. Facilitating workshops, conducting student learning, creating exhibition materials etc
 - Led Student Learning Experiences (SLEs) for ages 12-25, designing tailored walkthroughs and interactive activities.
- OurRiver OurLife **2024**
Research Associate
 - Conducted biodiversity surveys along a 30 km stretch of the Khandepar River to document fauna diversity and identify key habitats.
 - Facilitated art workshops along the Khandepar/Mahdei River to engage local communities and integrate their knowledge into conservation strategies.
 - Drafting a Conservation Report on best practices, informed by local practices and value systems.
- Spinfinity and Naxxatra **2023 - 2024**
STEM Educator
 - Designed and implemented hands-on workshops on Evolution and Biomimicry for high school classrooms, incorporating Nature's Principles and Ask Nature workflows.
 - Co-conducted 'Origami in Nature' workshops in government schools.
- Schooled Sports **2022-2023**
Swim Instructor - Scooled
 - Taught students aged 4 - 60 how to swim using scientific principles like buoyancy, propulsion and drag.
 - Adapted communication of these concepts to suit individual students' predispositions.
- ReefWatch Marine Conservation - Andaman **2022**
Naturalist
 - Created and delivered a talk on Biomimicry, connecting concepts to the native flora and fauna of the Andamans.
 - Led 'Nature Walks,' showcasing Biomimicry principles in various local ecosystems.
 - Conducted hands-on art workshops in local schools to foster ecosystem awareness.
 - Edited and captioned social media posts for the Chidiyatapu base of ReefWatch.
- Arizona State University **2019 - 2021**
Research Assistant and Anatomy Lab TA
 - Studied emergence of complex social behaviors like foraging and mating in leaderless groups (e.g., eusocial insects).
 - Researched foraging variation in *Temnothorax rugatulus* ants and co-presented findings at the Annual Evolutionary Biology Conference.
 - Prepared weekly materials, dissected/labeled vertebrate systems, and created practical exams for a lab of 20 undergraduates, averaging a Grade B+.
